

CIO Council Communications Subcommittee  
October 26, 2004

The Communications Subcommittee met Tuesday, October 12, 2004, at 10 am at the Iowa Utilities Board. Julie Noland, IFA; Darrell Fremont, DAS-ITE; and Margaret Munson, Iowa Utilities Board attended the meeting.

Darrell Fremont showed us the new template he has created as a possible new design for the CIO Web site.

The "Council Room" would link to a password-protected area. The white space in the middle is for news. More discussions are needed about content beyond minutes, meeting notices, documents from meetings, and committee reports. The Education and Emerging Technologies committee will also have some content suggestions. Discussions are also needed about who will have rights to post content to the site.

Julie Noland will create a draft interview questionnaire that could be used to post info about the CIOs and their agencies.

For comparison, Darrell will redesign the logo with the mission statement on it using the capitol as the graphic instead of the flag.

CIO Council members will be asked at the meeting today to send content suggestions to this committee.

The next communication committee meeting is tentatively scheduled for Tuesday, November 16, at 10 am in Conference Room 4 at the Iowa Utilities Board. Margaret Munson will send a meeting invitation.
